Log in ?

Username:

Password:

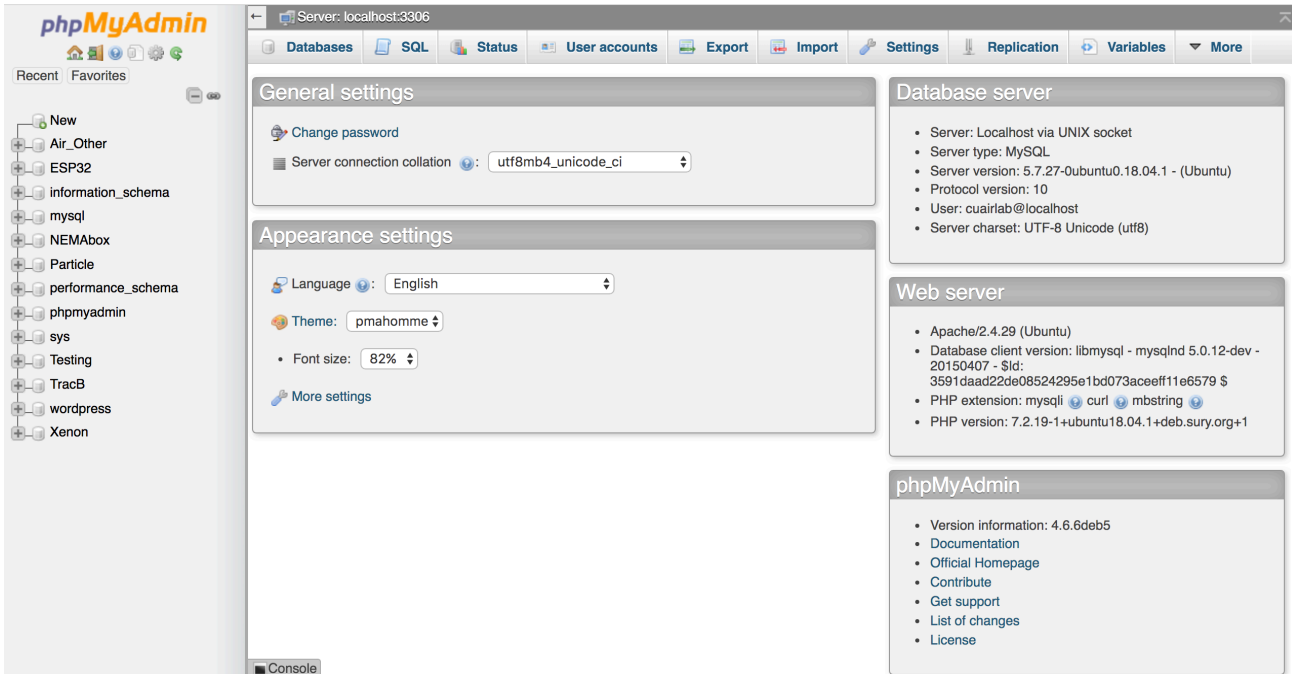

Go

Type in the username and password given below:

Username: **cuairlab**

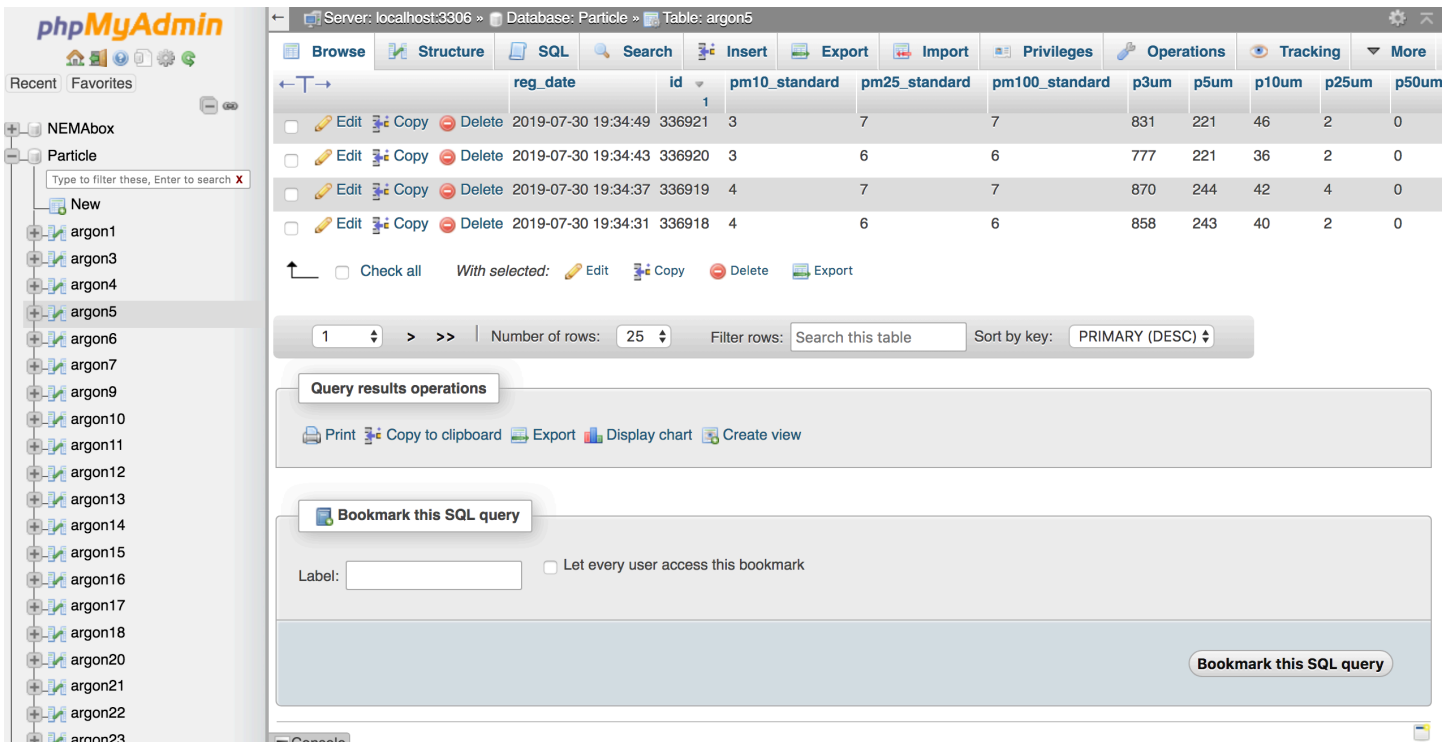

Password: **cuairlab@camp292**

Once you type in the username and password you shou see a page similar to this

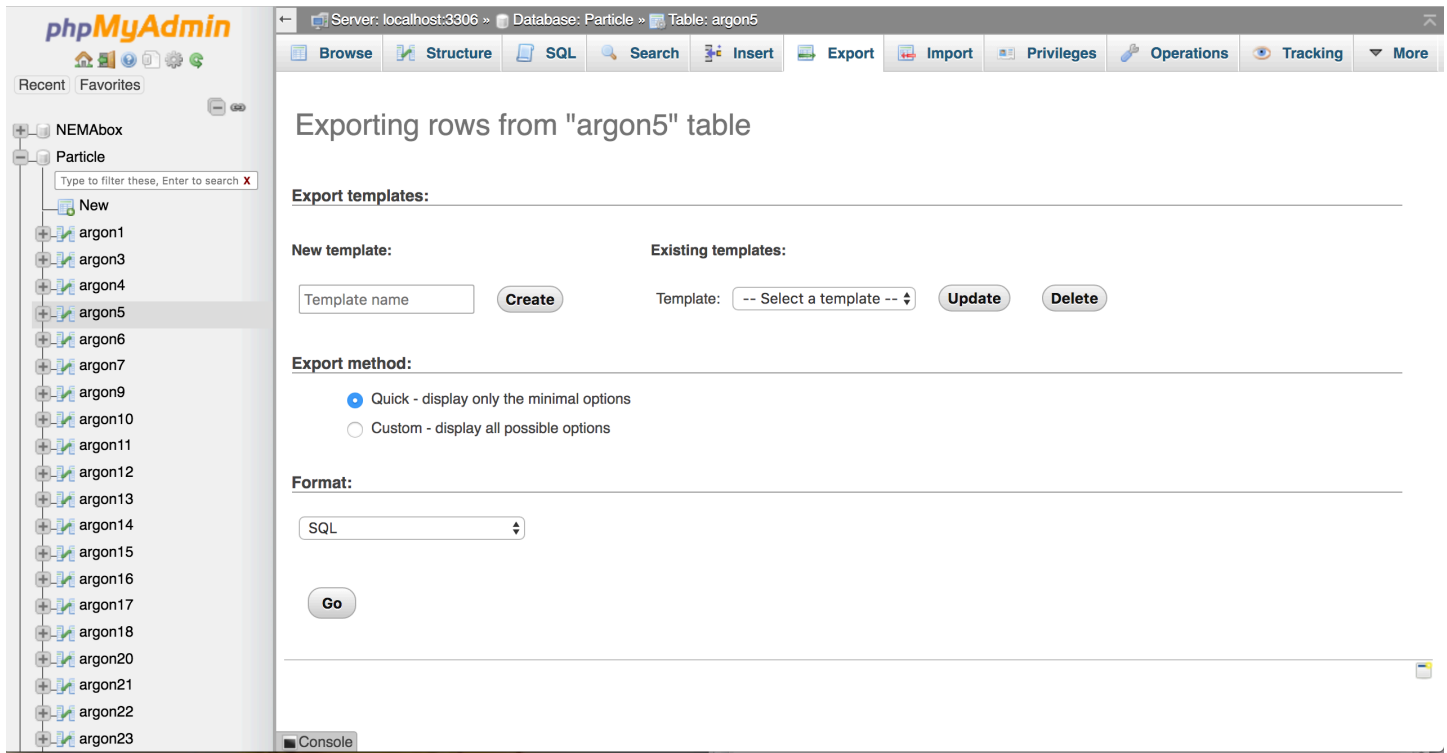

2. Select **Particle** and you should see all the sensors (eg: argon1, argon3..)

3. Select the sensor (say argon 5) that you want to download data from and scoll down. You should be able you see something like this

4. At the bottom click on **Export** and it will take you to another page where you can select the file format. If you see an error click **ignore all** and then you should be able to see something like this

5. In the format tab select the file format to **CSV** and click **Go** to download the file.
